Artemis Woman Heel Smoother: The Lazy Girl's Pedicure!

Almost *exactly* a year ago I told you about my new found love for the [Artemis Woman Heel Smoother](#). This is a great product that I'm still loving and thought needed to be mentioned again with my "pretend" month of pedicures.

In the last year I've cut back a bit on my use of the heel smoother (I'm not using it about every 3 weeks or so), mostly because it can be very easily overused. It's very easy to use, I sit down in the shower and use the tips

on my heels, any rough spots but mainly on the cuticle area. It makes quick work of smoothing my skin with very little effort. Truly, I do have to be careful to not over do it as I just end up prone to blisters if I'm not paying attention! I love that my Heel Smoother is waterproof as well, making it very easy to use in the shower and rinse off afterwards.
