

## TREAT YOUR FEET

**ARTEMIS WOMAN HEEL SMOOTHER PRO, £24.95**

**The at-home promise:** It's all very well chaffing away at your feet with a foot file, but unless you commit to it on a daily basis for a month or so, it's tough to get results. This motorised file with rotating crystal tips claims pro pedicure results. It has two speeds, depending how rough your skin is, and two heads – a larger one for heels and a smaller one for toes.

**Our DIY-er says:** 'As I took this out of the box, my curious boyfriend asked what it was, so I told him. "That's a good idea, your feet are like concrete," he said. I was offended, but he does have a point. It seemed a bit scary (it tells you how *not* to cause yourself injury), but actually I think you'd be hard pressed to hurt yourself – it even stops turning if you press too hard. In 20 minutes I had the best home pedi I've ever managed. Even the boyfriend was impressed and asked if I'd do his too. Luckily, it's easy enough even for a boy to use, so I was spared.'

**VERDICT:**
